

Cotton Ginnery Shipped Worldwide

COMPLETE TURNKEY PROJECTS
Americott has over 25 years building cotton ginneries. Our focus is the international market which makes us truly unique. We seek to build long term relationship with our clients, not only supplying complete gins but also giving after care service for years to come. Our gins are designed to suit the country of destination and specification of the ginner.

“ We are committed to our values of reliability and trust. ”

AMERICOTT COTTON GINS WORLDWIDE

Americott

Complete TurnKey Services

DESIGN

American Gin machinery is the best in the World, but the gins are designed and built to process American grown cotton. Our unique service incorporates a full re-design and we take into consideration all aspects of the new location parameters and specific requirements.

MANUFACTURE

Over the years we have manufactured gin machinery for a vast variety of projects across the world. Our main focus is the supply of Complete Cotton Gins to the international market.

REFURBISH

The refurbishment process is engineering skill at its most creative. Replacing all the wear parts and modifying where necessary to update components.

LOGISTICS

We take control of all aspects of the process, including trucking, containerizing and shipping. We are skilled at all the necessary paperwork to ensure all the necessary procedures are applied resulting in a smooth and on time project.

IT'S OUR BUSINESS

We offer a wide array of cotton gin solutions to suit the needs of ginneries, both in terms of quality and cost. We believe in "on the ground" knowledge: quality gin building requires a combination of both knowledge of machinery, the clients time scheduling and a myriad of important job details that only experience can provide for a smooth, cost effective, timely transaction.

Only Americott. We provide quality personalized services in an industry dominated by a primary focus on the US market. Other companies class International sales secondary, where we at Americott strive to maintain equality in our services to all our clients.

SHIPPING SCHEDULES

Exporting gin machinery out of America involves complying with various US Federal Regulations. Americott handles all these issues and documentation in advance to meet shipping schedules.
